

D-OMEGA SYRUP

It contributes to the maintenance of normal brain function. It has beneficial effects for everyone and taking them daily is recommended for improving health and development.. Omega-3 acid triglycerides are essential fatty acids, which cannot be synthesized by the body in sufficient quantities. EPA and DHA are important for optimal development.

It contains highly purified Omega-3 fatty acids, as well as Vitamin E and Vitamin C that both contribute to reduce oxidative stress, Vitamin D that is essential for the proper function of the immune system and Vitamin A that is important for vision.

HEALTH BENEFITS

- Increases birth weight (due to a better quality of cells).
- Decreases the risk of premature birth.
- Improves cerebral development.
- Improves visual development.
- Protects the skin against aging.
- Supports the immune system.
- Supports the heart and blood pressure.
- Improves your metabolism and flexibility of the joints.
- Improves the sense of well-being and positive mental attitude.
- Reduces stress.

Although useful for everyone, the composition of D - Omega Syrup is specifically adapted to the needs of pregnant women and pre-school age children.

Vitamin A helps, form and maintain healthy teeth, skeletal and soft tissue, mucus membranes, and skin.

Vitamin C maintaining healthy skin, blood vessels, bones and cartilage.

Vitamin E functions as an antioxidant, its role in anti-inflammatory processes, its inhibition of platelet aggregation and its immune-enhancing activity.

Vitamin D3 is a fat-soluble vitamin that helps your body absorb calcium and phosphorus.

Omega-3 acid triglyceride have many potential benefits for your cardiovascular health. One key benefit is that they help lower your triglyceride levels.
